

## FOR IMMEDIATE RELEASE

## DAML for Azure Database Now Available on Microsoft AppSource

**New York** — **December 8, 2020** — <u>Digital Asset</u>, creators of the open-source <u>DAML</u> smart contract language, today announced the availability of **DAML for Azure Database** on <u>Microsoft AppSource</u>, an online cloud marketplace providing tailored line-of-business solutions.

Digital Asset changes how businesses collaborate and solve complex multiparty workflows through DAML, a state-of-the-art smart contract language and developer ecosystem for building connected applications that span data silos and trust boundaries. DAML applications run on platforms ranging from fully decentralized distributed ledgers to traditional databases, with full application portability if business needs change. The new solution is designed for companies that don't need a fully decentralized blockchain network but want to use multiparty applications to improve collaboration and automate repeatable workflows. DAML for Microsoft Azure Database is built on Digital Asset's open-source <a href="DAML for PostgreSQL">DAML for PostgreSQL integration</a>, which takes advantage of the highly available and resilient Azure Database stack to enable businesses to automate internal multiparty workflows on a traditional enterprise database.

Tim Kemp, Senior Director, Product Development, Digital Asset said, "We brought DAML for Azure Database to Microsoft AppSource so customers can immediately deploy multiparty applications on Microsoft's powerful cloud infrastructure, fueling enterprise operations worldwide with enterprise SLAs and support. Whether DAML for Azure Database is proving out future blockchain investment or solving internal workflows for greater efficiency, the solution gives developers unique tools to deploy production-grade applications on Azure."

Toby Bowers, General Manager, Business Applications Group, Microsoft Corp. said, "We're happy to welcome Digital Asset and DAML for Azure Database to Microsoft AppSource, which gives our customers great exposure to cloud customers around the globe. Microsoft AppSource offers partner solutions such as DAML for Azure Database from Digital Asset to help customers meet their needs faster."

## **About Digital Asset**

Digital Asset helps companies of all sizes and across industries build and deploy distributed applications. At the core of our service offering is DAML, an open source and platform independent smart contract language that enables developers to write an application once and deploy it anywhere.
